

FOR IMMEDIATE RELEASE

Bridgton, Maine
June 15, 2010

Shively Labs® announces the appointment of Dale Ladner as Sales Manager for the Middle and Southeast territory of the US including the Caribbean and Central American markets.

Dale will rejoin Shively Labs, a division of Howell Laboratories Inc.®, after more than a decade away working for Passive Power Products (now Electronic Research Incorporated) and Dielectric Communications in Sales related positions from FM Product Specialist to Quotations and Technical Services Group. Dale has worked in the RF component and antenna manufacturer field since 1986, starting as a Purchasing Agent for Microwave Techniques of Raymond, Maine, purchasing for products used in Military radar, Food Service processing and Aeronautical radar components.

Included in his 24 years of experience in the RF industry, Dale was employed at Shively Labs previously, defining and developing the Western Territories of the US antenna market for Shively radio antenna, filter and RF component sales. He also spent many years serving Howell Laboratories, Inc. as a Production Controller and Purchasing Agent, working with Naval military dehydrators, and air control and purification systems used ship board for radar and dry air service.

Dale is a graduate of the University of Maine with a degree in Business Management.

The Shively Labs division is North America's largest supplier of FM broadcast antennas, filters, combiners and RF components. Howell Laboratories, an employee owned company, is a leading supplier of specialized marine fluid processing machinery to the United States Navy and to Bath Iron Works and the other Navy building yards.
