

Shively Labs® and Broadcast World partner for FM systems in the Philippines.

Shively Labs is delighted to announce that it will be working with Broadcast World Philippines Systems Inc. (BWPSI) to supply FM antennas, combining and filtering systems to radio stations in the Philippines. BWPSI is a full service provider of technology for radio and TV stations throughout the Philippines and has a long and impressive portfolio of engineering successes.

Shively Labs will offer custom antenna development capability and work directly with BWPSI's engineers to ensure that FM stations enjoy unrivalled coverage and performance together with legendary Shively reliability. Shively Labs has focused exclusively on FM radio transmission systems since 1963 and is looking forward to a long a successful partnership with BWPSI.

BWPSI and Shively Labs celebrate their new partnership and look forward to a long relationship. From L-R: Desy Kelly, Miriam Pineda ( BWPSI) and Angela Gillespie, Martyn Gregory (Shively Labs)
