

## Effect of Altitude on Power Ratings

### NOTE

This curve is based on the exponential breakdown potential of air with altitude. Refer to NAB Engineering Handbook, 6th edition, page 289 and Marks' Standard Handbook for Mechanical Engineers, 8th edition. For practical purposes, effects are negligible below 3000 feet (915 meters).

Document No. [tb-power\\_vs\\_altitude \(0511\)](#)
